Virginia Carolina) Everybody" You will be satisfied, and so will the buyer of your tobacco if you improve the quality and increase the weight of your tobacco by using 500 to 800 lbs. of Virginia-Carolina Fertilizer per acre, ten days before planting. These fertilizers give an early start to the plant, which very soon grows large enough to withstand the ravages of insects. Soils that under ordinary conditions would make a yield of poor, papery tobacco, lacking in gummy or oily matters, will produce a very high type of tobacco by liberally using these fertilizers.
